It sparked something in me the moment I saw it, and I thought to myself I could really enjoy this game, but after playing I can say aloud that it wasn't for me at all.

What I liked:

Easy to understand (objectives, controls).
Fast paced (not much of a waiting game, constantly on the move).
Challenging (keeping up with demand isn't always easy).
Lively (the npcs are fun to work with, even if they don't say anything).
Daily cycle (open the shop in the morning, close at night).

What I found dissatisfying:

Monotonous (repetitive).
Objects (large\u2610medium\u2610small - everything looks unattractive).
Hard to move in a tight shop (part of the game, but if the NPC can move through a tight spot, why can't I?)
Sprint is a tad bit slow.

I don't know .. I just don't like the game.

. If you love the original game you will definitely love this DLC, everything it includes add fun to the original.
In fact I think the price of this is much more reasonable compared to the base version.. The idea of an RPG with a WW2 aircrafts sounds great. But the handling is aweful. I was about to throw my flightstick out of the window because it did everything but what i wanted him to do. Even installed my old IL-2 just to compare. And no its not the flightstick....
However the handling of the aircrafts seems to be more precise when using keyboard or maybe a gamecontroller, but I will not use a keyboard or gamecontroller for flying planes.. I enjoyed playing this game with my daughter. She was on her PC and me on mine, full screen on each end. We had fun exploring and building and fighting skeletons. Now I cannot join a game with her at all and vice versa. We've updated the game and steam and are still unable to play without plugging another controller in to the same PC, sit right up on each other and deal with an irritating split screen. What happened LEGO (or maybe Steam)? Why is this game now less playable? I'll change my thumbs down to a thumbs up when this is fixed.. Using same review for all Zup games.

Main reason to get, make your profile look better with the many differently designed achievements.

Very cheap and would highly recommend when in bundle.

Loads of achievements for the achievement hunters.

Can be fun to play but games are not very long because of easy puzzles.

Heard that there is a Zup 5 in greenlight.

If they can make some original achievements fair enough but as a steam user that wishes we have something like a gamerscore like with the Xbox, games like this would not exist on steam.

(but would probs still get if very cheap)

. Experience an electric ritual firsthand, where babies sacrifice their thralls to feed their sadistic delusions. Then plunge

headfirst into the shoes of a detective you only know for a brief moment before the game crashes and you're left wondering what it all was for...

That is the mystery, that is the adventure.. Great time-killer game even the game is relatively short in my opinion. (o.o)b

you wanna press the button 100k times and you win. Very intuitive and useful. This is a great tool to add to the box.. **DLC verdict: Get it on sale OR Get it in the bundle with the base game**

Comment:

Another great ambient soundtrack by Amanita Design and Tomas Dvorak. It is easy to listen to while performing other tasks as it nicely creates a relaxing atmosphere. Also available in this package is the art book which shows the creative process that goes into making the art for Machinarium. Best to get all of this in the bundle with the base game (or the Amanita Bundle).

If you liked this DLC review you can find more in my [Review Corner](#).. [The game has currently a few flaws. It is already better than FIFA and has the potential to become the best soccer game in the world some day](#).. [There was no story at all, 4 songs and sometimes it would distort the screen if you do well. Once you finish the game it just loops the last song over and over without telling you whats happening. Not really a horror game, they said 7 songs but 3 are an "arcade mode"](#). [Wouldn't bother](#).. [Really short, and the hand controllers glitched out a few times while I was playing. But it is a free demo, and I was intrigued enough to want to see what the developer can come up with in a larger experience.](#)
